

Bandhan Tours Website Revamp, Digital Booking Engine & Management Platform – Statement of Work

Client : Bandhan Tours

Company : ZootechX

1. Introduction

This Statement of Work (SOW) outlines the scope for the redesign and development of the Bandhan Tours Digital Booking Engine & Management Platform.

The objective of this engagement is to modernize the existing digital presence of Bandhan Tours by improving the website experience, streamlining customer booking workflows, and introducing centralized customer and administrative management capabilities.

The proposed solution will deliver a responsive, scalable, and user-friendly platform that supports both standard tour bookings and customized travel requests while preserving the brand identity and business offerings of Bandhan Tours.

2. Project Objectives Primary

Objective

To build a modern travel booking and management platform that enhances customer experience, simplifies operational processes, and establishes a scalable foundation for future digital initiatives.

Key Objectives

- Redesign the existing website with an improved UI/UX experience
- Simplify the customer booking journey
- Enable structured tour discovery and package management
- Introduce customer and admin management portals
- Centralize inquiry and booking workflows
- Support future integrations and business expansion

3. Scope of Work

3.1 Website Revamp & User Experience

The customer-facing website will be redesigned with a modern, mobile-first approach to improve usability, engagement, and conversion rates. **A. Homepage & Navigation** Features include:

- Modern and responsive UI/UX design
- Interactive banners for destinations and promotions
- Improved navigation structure
- Destination and package search functionality
- Strategic call-to-action sections for inquiries and bookings

B. Tour Discovery & Listings

The platform will support structured travel categories, including:

- Domestic Tours International Tours Group Tours
-

Customized Tour Packages

Seasonal and Special Departures Users

will be able to filter packages based on:

- Destination
- Budget
- Duration
- Tour category
- Featured packages

C. Tour Detail Pages

Each package page will include:

- Detailed itineraries
- Pricing information
- Inclusions and exclusions
- Hotel details
- Image galleries
- Frequently Asked Questions (FAQs)
- Inquiry and booking options
- Customer testimonials

D. AI FAQ Chatbot

Intelligent chatbot to answer frequently asked questions related to destinations, visas, inclusions, exclusions, cancellations, travel policies, and general customer queries.

3.2 Digital Booking Engine

The platform will support both standard package bookings and customized travel requests.

A. Standard Booking Workflow The customer journey will include:

- Tour selection and package viewing
- Traveller information capture
- Booking and inquiry submission
- Customer confirmation workflows

B. Customized Tour Workflow

The customized booking module will provide:

- User registration and login • Destination-based package selection • Submission of:
 - Travel dates ○ Number of travellers
 - Budget preferences
 - Special requirements
- Request tracking through the customer portal

C. Agent Portal

- Secure role-based login
- View & manage assigned bookings
- Verify pricing, traveller details and availability

- Approve/reject bookings
- Modify/cancel bookings
- Generate quotations
- Send receipts, invoices, itineraries and vouchers
- Notify customers via Email/WhatsApp
- Upload travel documents
- Internal remarks & audit trail

Booking Pipeline

Customer Request → Agent Verification → Pricing & Availability Validation → Approval → Payment Confirmation → Documents Generated → Customer Notification → Post-booking Support.

3.3 Customer Portal

A dedicated customer dashboard will provide centralized access to bookings, requests, and travel information.

Core features include:

- User profile management
 - My Bookings section
 - Customized request tracking
 - Booking status updates
 - Traveller information management
- Downloadable itineraries
- Inquiry history
- Notifications and announcements

3.4 Admin Management Portal

The administrative dashboard will enable efficient management of tours, customers, bookings, and website content.

A. Tour Management

- Create, edit, and manage tour packages
- Itinerary management
- Media uploads
- Pricing configuration
- Availability scheduling

B. Booking Management

- View inquiries and booking requests
- Manage customized tour requests
- Update booking statuses
- Traveller information management
- Basic reporting functionalities

C. Customer Management

- Customer profile management
- Inquiry tracking
- Communication records

D. Content Management

- Blog management
- Testimonials
- Gallery updates
- Homepage banners and promotional content

4. Additional Features Mobile Responsiveness

The platform will be optimized for desktop, tablet, and mobile devices to provide a consistent user experience across all screen sizes.

Performance & SEO

The solution will incorporate:

- Optimized page loading speeds
- SEO-friendly architecture
- Improved search visibility
- Optimized media assets

Security & Access Control

Security measures will include:

- Secure authentication systems
- Role-based user permissions
- Protected booking and customer information
- Online payment gateways
- Sharing of tour itinerary on Whatsapp and email

5. Deliverables Customer-Facing Website
